- Underground ventilation pipes and fittings dimension 1200 mm
- Design and calculations
- Welding services

Clarion Hotel® Arlanda Airport Terminal chose Uponor underground ventilation

Saving of buildable space
Clarion hotel Arlanda Airport Terminal is Scandinavia's closest meeting place. It is a first-class hotel in the middle of Arlanda Airport on 14 floors with 44 meeting rooms and 430 hotel rooms.

Project Facts:

Location	Floor space	Completion
Stockholm, Sweden	30 000 m²	2012
Building Type	Product systems	Number of floors
Hotel buildings	Ventilation	14
Project Type		
New building		

Underground ventilation installed outside the building save indoor space

The hotel's total area is 30,000 m^2. These areas include a building with two technology rooms that supply the hotel with preheated air via ventilation ducts in the ground - a cost-effective and smart choice compared to a traditional solution that takes up a lot of buildable space.

Uponor Infra delivered a designed system of pipes and fittings in dimension 1200 mm, completely according to the customer's needs.

Clarion Hotel® Arlanda Airport Terminal chose Uponor underground ventilation

Benefits of working with Uponor Infra

- Uponor Infra delivered a specially designed system completely according to the customer's needs
- Large savings of space

- Underground ventilation meant that the pipes did not have to be transported inside the building.
- Specially designed products
