Material	Engineered Polymer	
Temp/pressure ratings	73 °F (23 °C) at 160 psi (11 bar)	
	180 °F (82 °C) at 100 psi (6.9 bar)	
	200 °F (93 °C) at 80 psi (5.5 bar)	

Product information and application use

Commercial engineered polymer (EP) flow-through multi-port tees feature 11/4" or 2" ProPEX® inlets with 34" or 1" ProPEX branch outlets.1 The tees are made of engineered polymer (EP), a highperformance material used in demanding, hot-water applications.

Note: Temperature and pressure ratings stated are hydrostatic ratings. For domestic hot-water (DHW) and DHW recirculation installations, operating conditions should not exceed 140°F (60°C) at 80 psi (5.5 bar) in accordance with ASTM F2023. For additional information regarding applicationspecific temperature and pressure ratings, refer to the Uponor PEX Piping Systems Design and Installation Manual.

Properly mount the multi-port tee by securing all adjoining PEX pipes to the framing or support structure within 6" of each ProPEX connection. For more information, refer to the Uponor Piping Systems Installation Guide.
