## Hot tap water delivered energy efficiently

Combi Port heat exchanger units were selected for seven apartment buildings made of logs in Oulu.

The decentralized system is a new, energy-efficient approach to distributing hot tap water and heat to homes. The solution was implemented in seven detached houses that have just been completed in Oulu: only heating water and hot tap water are supplied to the houses. The rest is handled by each house's own heat exchanger. The result is living comfort and a significant reduction in heat loss.

## Project Facts:

Location	Completion
Oulu, Finland	2020
Building Type	Product systems
Single family home	Port
Project Type	
New building	

## Partners

Contractor: Jopera Oy  
HVAC designer: Taitoplan Oy  
Installer: LVI-Japexit Oy
