Uponor brings the comfort of its Underfloor Heating & Cooling radiant systems to a prestigious renovation project to transform a Northern Italy 1700s Palace into comfortable offices.
transion a Northern italy 1700s Falace into connortable onices.
The beautiful and historical palace, graced with exquisite frescos, is situated in Brescia (Lombardia) a Northern Italy city
dating back to the Roman times, known as the "Lioness of Italy", and internationally famous as it is the starting and ending
point of the historical car race "Millemiglia".
In this project the architectural constraints were fundamental in choosing an underfloor heating and cooling solution.
Here are the main characteristics of the building:
nere are the main characteristics of the building.
- very tick walls (>80 cm)
- no thermal insulation
- no tremai instration
- high thermal mass
- high thermal inertia
nigh dierma mertia
The particular nature of the building that was to be used as office space required an installation with very reduced inertia,
highly performing and extremely comfortable.

Uponor installed the low tickness underfloor panel Minitec, Uponor dehumidifiers, and ZRS-K controls.
