## Technical data

 Material
 LF Brass

 End type 1
 Compression 1/2"

 End type 2
 UNEF 3/8"

Temp/pressure ratings 194 °F (90 °C) at 145 psi (10 bar)

Prop 65 label required? Yes

## Product information and application use

For point-of-use shutoff at the fixture, compression straight and angle stop valves are lead-free (LF) brass, chrome-plated, quarter-turn ball valves that include a Teflon®-coated brass compression ring and a stainless-steel insert for compression connection to 1/2" Uponor AquaPEX® pipe and a 3/8" male threaded connection for fixture risers.

Note: Temperature and pressure ratings stated are hydrostatic ratings. For domestic hot-water (DHW) and DHW recirculation installations, operating conditions should not exceed 140°F (60°C) at 80 psi (5.5 bar) in accordance with ASTM F2023. For additional information regarding application-specific temperature and pressure ratings, refer to the Uponor PEX Piping Systems Design and Installation Manual.

## nstallation Related applications

Install valves according to local building code. Use only the Teflon®-coated brass compression rings and stainless-steel inserts supplied by Uponor with these compression stop valves. Substitution can result in valve connection failure. Do not dismantle. Refer to the Uponor PEX Piping Systems Design and Installation Manual or Uponor PEX Piping Systems Installation Guide for additional information. For rigid fixture riser connections, use the Uponor %" OD Compression Nut and Nylon Sleeve (part number F5440380), sold separately.
