Hot tap water delivered energy efficiently

Combi Port heat exchanger units were selected for seven apartment buildings made of logs in Oulu.
The decentralized system is a new, energy-efficient approach to distributing hot tap water and heat to homes. The solution was implemented in seven detached houses that have just been completed in Oulu: only heating water and hot tap water are supplied to the houses. The rest is handled by each house's own heat exchanger. The result is living comfort and a significant reduction in heat loss.

Datos del proyecto:

Location
Oulu, Finland

Finalización
2020

Tipo de edificio
Vivienda unifamiliar

Product systems
Port

Tipo de proyecto
Obra nueva

Colaboradores

Contractor: Jopera Oy
HVAC designer: Taitoplan Oy
Installer: LVI-Japexit Oy
