Hot tap water delivered energy efficiently

Combi Port heat exchanger units were selected for seven apartment buildings made of logs in Oulu.

The decentralized system is a new, energy-efficient approach to distributing hot tap water and heat to homes. The solution was implemented in seven detached houses that have just been completed in Oulu: only heating water and hot tap water are supplied to the houses. The rest is handled by each house's own heat exchanger. The result is living comfort and a significant reduction in heat loss.

Datos del proyecto:

Location	Finalización
Oulu, Finland	2020
Tipo de edificio	Product systems
Vivienda unifamiliar	Port
Tipo de proyecto	
Obra nueva	

Colaboradores

Contractor: Jopera Oy
