 Prop 65 label required? Yes

Product information and application use

The Uponor Powered Four- and Six-zone Controllers feature transformers for low-voltage operations and relays to operate line-voltage controls. Fully fuse protected, they also include an isolated switch and built-in domestic hot water (DHW) priority switch. The indicator lights show full functionality of the products wired to the Powered Zone Controllers. The green light indicates power is connected. When the thermostat calls for heat, both the appropriate zone valve and yellow indicator light activate. When the zone valve is fully open, the end switch relay and red indicator light activate. A 3-amp delay fuse protects the Powered Four-zone Controller. A 7-amp delay fuse protects the Powered Six-zone Controller.

| Part name | Part no. | Current draw max. [A] | Operating voltage AC [VAC] |
|------------------------------|----------|-----------------------|----------------------------|
| Powered Four-zone Controller | A3080404 | 3 | 120 |
| Powered Six-zone Controller | A3080406 | 7 | 120 |

| Part name | Part no. | Codes | Standards | Listings |
