### Product information and application use

The Uponor Heat-only Thermostat with Touchscreen (A3100101) is a simple, non-programmable thermostat designed to sense room air temperature using operative temperature and/or floor temperature via an optional floor sensor (A9010599).

## Installation Related applications

Install the thermostat on an interior wall of the desired zone approximately 5 feet above the floor. Do not mount the thermostat on a location that may be affected by localized heat sources or cold drafts. It may be necessary to install a draft barrier behind the thermostat to prevent air from blowing through the wiring hole which can affect the thermostat's built-in sensor. Refer to the Uponor Heatonly Thermostat with Touchscreen Installation and Operation Manual for more information.

#### Notes

Floor sensor:

10K, J-curve thermistor

Ambient conditions:

10% to 90% humidity (non-condensing)

Sensor type: 10k J-curve

Tolerance: +/- 1% at 77°F (25°C)

Wire type: 22 gauge IP68 continuous immersion 3m /10 ft
