Product information and application use

Engineered polymer (EP) flow-through multi-port horizontal tees are used in hot and cold domestic potable water distribution systems. The tees feature 3/4" ProPEX® inlets with 1/2" ProPEX outlets.

Note: Temperature and pressure ratings stated are hydrostatic ratings. For domestic hot-water (DHW) and DHW recirculation installations, operating conditions should not exceed 140°F (60°C) at 80 psi (5.5 bar) in accordance with ASTM F2023. For additional information regarding application-specific temperature and pressure ratings, refer to the Uponor PEX Piping Systems Design and Installation Manual.
