Technical data

194 °F (90 °C) at 44 psi (3 bar)

Prop 65 label required? Yes

Product information and application use

Uponor's Stainless-steel Manifolds all come standard with balancing valves and flow meters. These components are fixed to the supply side of the manifold and are used to balance and correct the flow of water or water/glycol mix through the manifold.

Part name	Part no.	Weight per UOM [lbs/UOM]
Stainless-steel Manifold Flow Meter 1.5 GPM Valve Body, replacement part	A2771020	0.13
Stainless-steel Manifold Flow Meter 2 GPM Valve Body, replacement part	A2771021	0.13

Installation	Related applications
To operate the flow meter, remove the plastic cover by pulling up, then rotate the flow meter either clockwise to restrict flow or counterclockwise to open. Once desired location is achieved, replace the plastic cap to lock the flow meter back in place. For more information, refer to the Uponor Stainless-steel Manifold Installation Guide.
