Underground ventilation installed outside the building save indoor space

The hotel's total area is 30,000 m^2. These areas include a building with two technology rooms that supply the hotel with preheated air via ventilation ducts in the ground - a cost-effective and smart choice compared to a traditional solution that takes up a lot of buildable space.

Uponor Infra delivered a designed system of pipes and fittings in dimension 1200 mm, completely according to the customer's needs.
