Informations sur le produit et utilisation de l'application

Uponor offers lead-free (LF) brass compression stop valves for use in all plumbing applications. Compression straight stop valves enable a direct connection and the compression angle stop valves enable a 90-degree turn. For point-of-use shut-off at the fixture, both valves connect 1/2" Uponor AquaPEX® tubing to 3/8" outside diameter (O.D.) risers. Compression inserts and rings are included for the LF compression angle and LF straight stop valves.

L'installation

Install valves according to local building code. Use only the stainless steel inserts supplied by Uponor with these compression stop valves. Substitution can result in valve connection failure. Do not dismantle. Refer to the Uponor Professional Plumbing Installation Guide for additional information.
