## Informations sur le produit et utilisation de l'application

TruFLOW™ classic manifold offset unions feature an R32 union by 1¼" BSP male connection for easy alignment of the supply and return piping at the manifold.

## L'installation

Use the TruFLOW Classic Manifold Offset Union to make the connection between TruFLOW manifolds and R32 manifold adapters. Remove the existing straight union assembly from the manifold to install this offset union. Use silicone oil on the male threads to ease installation. Use only the following Uponor TruFLOW manifold accessories: Replacement O-ring for 1¼" BSP Connections (A2620008) and Replacement Gasket for R32 Union Connections (A2620005). For more information, refer to the Uponor TruFLOW Classic Manifold Instruction Sheet.
