

WehoPuts 200pe installation

Implication d'Uponor

- ✓ WehoPuts biological treatment plant 200pe
- ✓ Technical support

Benders chose WehoPuts again

The family company Benders started in 1960 in Edsvära on the Varaslätten. Benders is today a market-leading manufacturer and supplier of products in concrete and natural stone.

Benders has on a few occasions over the years installed Uponor Infra's WehoPuts treatment plant and when they are now going to build more properties with office space, at their head office in Edsvära, they wanted to collect all wastewater into 1 treatment plant, dimensioned for 200 people.

Acona Miljöteknik, a partner of Uponor Infra, which works all over Sweden to service and inspect Uponor Infra's treatment plants, WehoPuts and Clean was contacted by Benders and the work of designing a treatment plant for 200 people started.

At the start of the project, Benders had thoughts of contacting another supplier of a similar solution, such as Uponor Infra's, but since they already had the experience of Uponor Infra's treatment plant, the choice fell on Uponor Infra's products again.

The treatment plant has been in operation without any problems since March 2019, inspection and service have been done and Benders are very satisfied with their choice of treatment plant.

Connaissance du projet

Location

Edsvära, Sweden

Achèvement des travaux

2019

Type de construction

Applications résidentielle

Product systems

Sewer, waste water treatment
