

AQUASAFE™ ALLIANCE MEMBERSHIP AGREEMENT

Residential Fire Safety Systems

This document will formalize the expectations and the relationship between GF Building Flow Solutions (Uponor) and a company intending to install the AquaSAFE™ residential fire sprinkler system. Contracting companies that enter into this agreement are expected to follow its terms. GF Building Flow Solutions (Uponor) will not be held responsible for any liability resulting from a contractor who deviates from the terms of this agreement and reserves the right to revoke the agreement due to any such deviation.

Licensing

AquaSAFE installers shall obtain and maintain all state, provincial and local licenses required to install multipurpose residential fire sprinkler systems.

Training

In addition to holding all necessary licenses, installing contractors are required to complete the Uponor AquaSAFE Training program and successfully pass the accompanying tests.

Designs

All AquaSAFE systems installed by a contractor shall be properly designed by qualified, competent designers that hold all applicable and required licenses and NICET certifications. The contractor must install the system as designed.

Any jobsite input provided by a contractor for a system design must be accurate and complete.

Installation

All AquaSAFE systems shall be installed by contractors who have

- a) Completed Uponor AquaSAFE Training programs and
- b) Meet all jurisdictional licensing requirements.

Contractors may only install systems properly designed by qualified and certified designers, and contractors shall install the system as designed. All components of the system must have all required listings and approvals.

All AquaSAFE systems shall be installed according to the standards set forth in NFPA 13D, IRC P2904, and the Uponor AquaSAFE Training programs. The installation also must meet any additional requirements established by the Authority Having Jurisdiction (AHJ).

Contractors shall conclude every AquaSAFE installation with a flow test and send the completed AquaSAFE Flow test Verification Form to GF Building Flow Solutions (Uponor). If a system is not designed by Uponor Construction Services, contractors must also provide design details to enact the system warranty.

Insurance

The contracting company shall maintain a \$1,000,000 minimum general liability insurance policy.
