Ultra Rib 2 Blue with up to 70% reduced CO₂ emissions

Ultra Rib 2 Blue is a plastic sewer pipe with up to 70% reduced carbon footprint. Based on renewable raw material using the mass balance approach, and with the same quality and performance as the traditional Ultra Rib 2.

Ultra Rib 2 Blue meets the double requirements for Nordic Poly Mark, with an expected lifespan of more than 100 years!

Ultra Rib 2 Blue is manufactured in the ISCC Plus-certified (International Sustainability and Carbon Certification) factory in Fristad,

Sweden. The customer gets a declaration of the amount of fossil-free material the delivery contains, and the pipe pallets are marked with Ultra Rib 2 Blue.

Ultra Rib 2 Blue is delivered in 3- and 6-metre lengths, in the dimensions 200 to 560mm.
