Manifold cabinets for water systems

Quality. Precision. Safety.

We are a Europe based manufacturer of installation cabinets for water and surface heating manifolds...

When designing new products, we value safety of use combined with simple and swift assembly. The new models of cabinets that we have introduced to our range guarantees a safe and tight connection between components of the water distribution system in the building, as well as a safe location for manifold installation. An established manufacturer of heating and water systems, we know exactly what the mechanical and plumbing industry values most: safety, durability and ease of installation.

HIGH QUALITY IN WORKMANSHIP
Powder-coating and robust design to protect from adverse conditions

SPLASH PROTECTION PLEXI GLASS INCLUDED
100 % tightness and splash-protection guarantee

EASY INSTALLATION AND SIMPLE OPERATION
Adjustable fixtures to facilitate under plaster instalation and key-free doors with fully detachable fronts

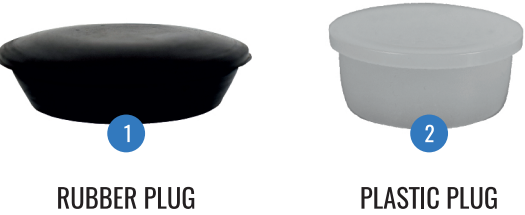

LEAKAGE SIGNALLING
