

Energy Efficiency. Installation Ease.

Meeting energy code requirements is part of your job. That's why we offer a smart solution that saves you time and costs.

With pre-insulated Uponor PEX pipe, you can eliminate the two-step process of insulating after pipe installation and meet the energy code requirements your projects demand.

How Pre-insulated Uponor PEX Meets Your Needs

- › Faster installations in one simple step
- › Stable material costs to accurately bid jobs
- › Long, flexible coils to eliminate added connections
- › Lightweight, easy to move
- › Resists corrosion, pitting and scaling
- › Highest chlorine resistance rating of '5' per ASTM F2023
- › Easily meet energy code requirements
- › Strong, durable ProPEX® connection system
- › No micro-cracking during expansion
- › Superior resistance to stress-crack propagation
- › Smooth surface for reduced pressure loss
- › Superior sound insulation qualities

Offering

	Pre-insulated Uponor AquaPEX®	Pre-insulated Wirsbo hePEX™
Application	Potable plumbing	Hydronic heating and chilled water
Pipe size	½" - 1¼"	½" - 1½"
Insulation	½" and 1"	½" - 1½"

Faster Installs

The long coils of Uponor pre-insulated PEX pipe speed installations to eliminate unnecessary connections with each change in direction and also remove the labor-intensive added step of insulation after pipe installations.

Meets Energy Codes

Uponor pre-insulated PEX pipe meets ASHRAE 90.1 and International Energy Conservation Code (IECC) requirements and helps support LEED® and National Green Building Standard™ practices so you can feel confident the piping system you're installing is designed to meet the demands of the application.

Superior Resiliency

Proven by Plastics Pipe Institute (PPI) Technical Report TR-52 for exceptional resiliency in freeze/thaw cycles.

Service and Support

Backed by a 25-year transferable limited warranty and supported by a trained staff of field technicians and a nationwide distribution network, Uponor is the reliable, dependable partner you can count on.
