

The Superior
Specified Water
Distribution
Solution

Uponor

Uponor Commercial Plumbing Systems

With over 40 years of proven performance and more than 15 billion feet of crosslinked polyethylene (PEX-a) pipe installed worldwide, Uponor is the specified choice for commercial domestic-water applications.

- Flexible; reduces number of fittings, connections
- Resists corrosion, pitting and scaling
- Lower, more stable material costs
- Life Cycle Analysis (LCA) favorable in comparison to copper
- No scrap value — eliminates jobsite theft concerns
- Superior thermal and acoustic properties
- ProPEX® expansion fittings feature larger internal diameter (ID) for greater flow
- Approved for continuous hot-water recirculation and fire-resistive construction
- Codes and standards: ASTM, NSF, CSA, UL, ICC and IAPMO
- ASTM E84 plenum rating
- Suitable for in-slab and under-slab distribution
- Cannot be dry fit; no torches, glues, gauges, solder, calibration or flux required
- Comprehensive offering of engineered polymer (EP) and lead-free brass fittings
- Helps projects meet Buy American requirements
- 25-year limited warranty on Uponor AquaPEX® pipe and ProPEX fittings
- Engineering support — BIM resources, construction details, submittals, specifications and training
