

## Underfloor heating for single family home with Comfort E

### Uključenost Uponora

## Underfloor heating for single family home with Comfort E

Uponor's electric underfloor heating system, Comfort E, was installed to a single family house, built in 1984, during the renovation project. Electric underfloor heating was carried out throughout the house, except for the sauna and shower rooms, which are still under planning.

Electric underfloor heating is an excellent solution for renovation or new building, both in terms of purchase price, flexibility and installation time. Uponor Comfort E is suitable for tile, laminate and parquet floors, in damp and dry areas.

### Činjenice o projektu:
