Uponor and Apply TB in Stavanger Concert Hall

Uponor underfloor heating systems have been installed in much of the concert hall. Uponor's plumbing systems have also been used for tap water and culverts, and a snow melting system has been placed in parts of the outdoor area. Teknisk Byrå from Apply TB was responsible for the plumbing installations, with Ove Kvalvaag as leading project manager and Geir Gabrielsen as leading foreman. Project Engineer Heidi Pedersen and Regional Manager Arne Aa have assisted Apply TB with the engineering on behalf of Uponor.
