## Underground ventilation installed outside the building save indoor space

The hotel's total area is  $30,000 \text{ m}^2$ . These areas include a building with two technology rooms that supply the hotel with preheated air via ventilation ducts in the ground - a cost-effective and smart choice compared to a traditional solution that takes up a lot of buildable space.

Uponor Infra delivered a designed system of pipes and fittings in dimension 1200 mm, completely according to the customer's needs.

### Clarion Hotel® Arlanda Airport Terminal chose Uponor underground ventilation

### Benefits of working with Uponor Infra

- Uponor Infra delivered a specially designed system completely according to the customer's needs
- Large savings of space
- Underground ventilation meant that the pipes did not have to be transported inside the building.
