XXXXX Uponor

- 120,000m of Uponor multi-layer composite (MLC) pipe.
2,250 MLC manifolds for domestic water systems.
- Uponor started working with the contractor three years ago as the company required a more reliable and stable solution. During the three-year partnership, the contractor has had zero leakages when using Uponor products.

Uponor started working with the contractor three years ago as the company required a more reliable and stable solution. During the three-year partnership, the contractor has had zero leakages when using Uponor products.

Full support was provided throughout the project including bespoke training in different languages for the production employees, advice on what to look out for on the production line in terms of tool maintenance and checks on the pipework once in situ.

- Consultation on the system design, assistance with inventory planning, installation and safety training and site-support
