## Hot tap water delivered energy efficiently

Combi Port heat exchanger units were selected for seven apartment buildings made of logs in Oulu.

The decentralized system is a new, energy-efficient approach to distributing hot tap water and heat to homes. The solution was implemented in seven detached houses that have just been completed in Oulu: only heating water and hot tap water are supplied to the houses. The rest is handled by each house's own heat exchanger. The result is living comfort and a significant reduction in heat loss.

### Коротко про проект

Location: Oulu, Finland  
Рік завершення будівництва: 2020

Тип будівлі: Приватні будинки  
Системи продуктів: Станції ГВП

Тип проекту: Референс об'єкти

### Партнери

Contractor: Jopera Oy  
HVAC designer: Taitoplan Oy  
Installer: LVI-Japexit Oy
